

Engineering the *Operating Core* of Modern Airports

What is your *Core* built on ?

Customer connected
value are core to
*Augment the airport's
potential at scale*

Potential to enhance customer experience

Potential to accept changing market dynamics

Potential to enable lean & flexible business processes

Potential to adapt new technologies

Trusted by leading aviation and airport organizations including Adani Airports, GMR Airports, Collins Aerospace, Ninoy Aquino International Airport (NAIA), Heraklion International Airport, DigiYatra & More... Staying ahead of the curve remains our constant ambition and competitive edge.

Modern Day *Challenges* *For Airports*

Legacy Tech-Systems

Unable to live up to modern day requirements of flexibility, scalability and Service Support

Data/System Integration & Real-Time Decision Making

Challenge to integrate all Data into a Single Operating Intelligence System

Increased Passenger Flows & Capacity Management

Absence of Future-Ready technology to manage fluctuating Airport demands

System Orchestration

Absence of Single Digital Platform for managing Air-Side and Terminal Side Operations

How are we solving these *Problems?*

Cost - Efficiencies

Cost-Effective Integration of Complex Systems. Using latest-technologies we have our own cost effective & flexible solutions for Airports SI

New-age Technology

Flexible, Scalable & Lite Tech-Airport Solutions built for modern day Airport requirements using AI-ML Models

Centralized Decisions

*Centralized Platforms
Single Digital Platforms for managing Air-Side and Terminal Side Operations to enable fast decision-making*

Future Preparedness

*Manage Dynamic Airport Operations
Preparing Airports Futuristically for Growing Passenger, Travel Ecosystem*

Our Airport *Solutions* are

Centralized yet Modular

Hyper Real-Time for Live Operations

Scalable With Growing Airport Needs

Secure, Resilient, And Always Operational

Compatible Across OEM Systems And Platforms

Intelligent, Enabling Automation and Smarter Decisions

One Partner. Multiple Solutions.

AI-Powered Solutions for Smarter, Safer, and More Efficient Airport Operations

AEROIS.ai PRODUCT SUITE

MASTER SYSTEM INTEGRATION (MSI)

End-to-end governance, oversight, testing, commissioning, and validation across all airport systems for assured delivery and performance.

SYSTEM INTEGRATION (SI)

Seamless integration of operational, enterprise, and third-party systems ensuring interoperability, data consistency & real time data exchange.

DESIGN CONSULTANCY FOR AIRPORTS

Specialized advisory services for airport infrastructure and passenger experience design.

BESPOKE APPLICATIONS

End-to-end custom software development tailored to Aviation client-specific requirements.

MANAGED SERVICES

24/7 monitoring, support, and continuous optimization ensuring system reliability, business continuity, and operational excellence.

SAFER OPERATIONS

GREATER EFFICIENCY

SMARTER DECISIONS

STRONGER COLLABORATION

SUSTAINABLE GROWTH

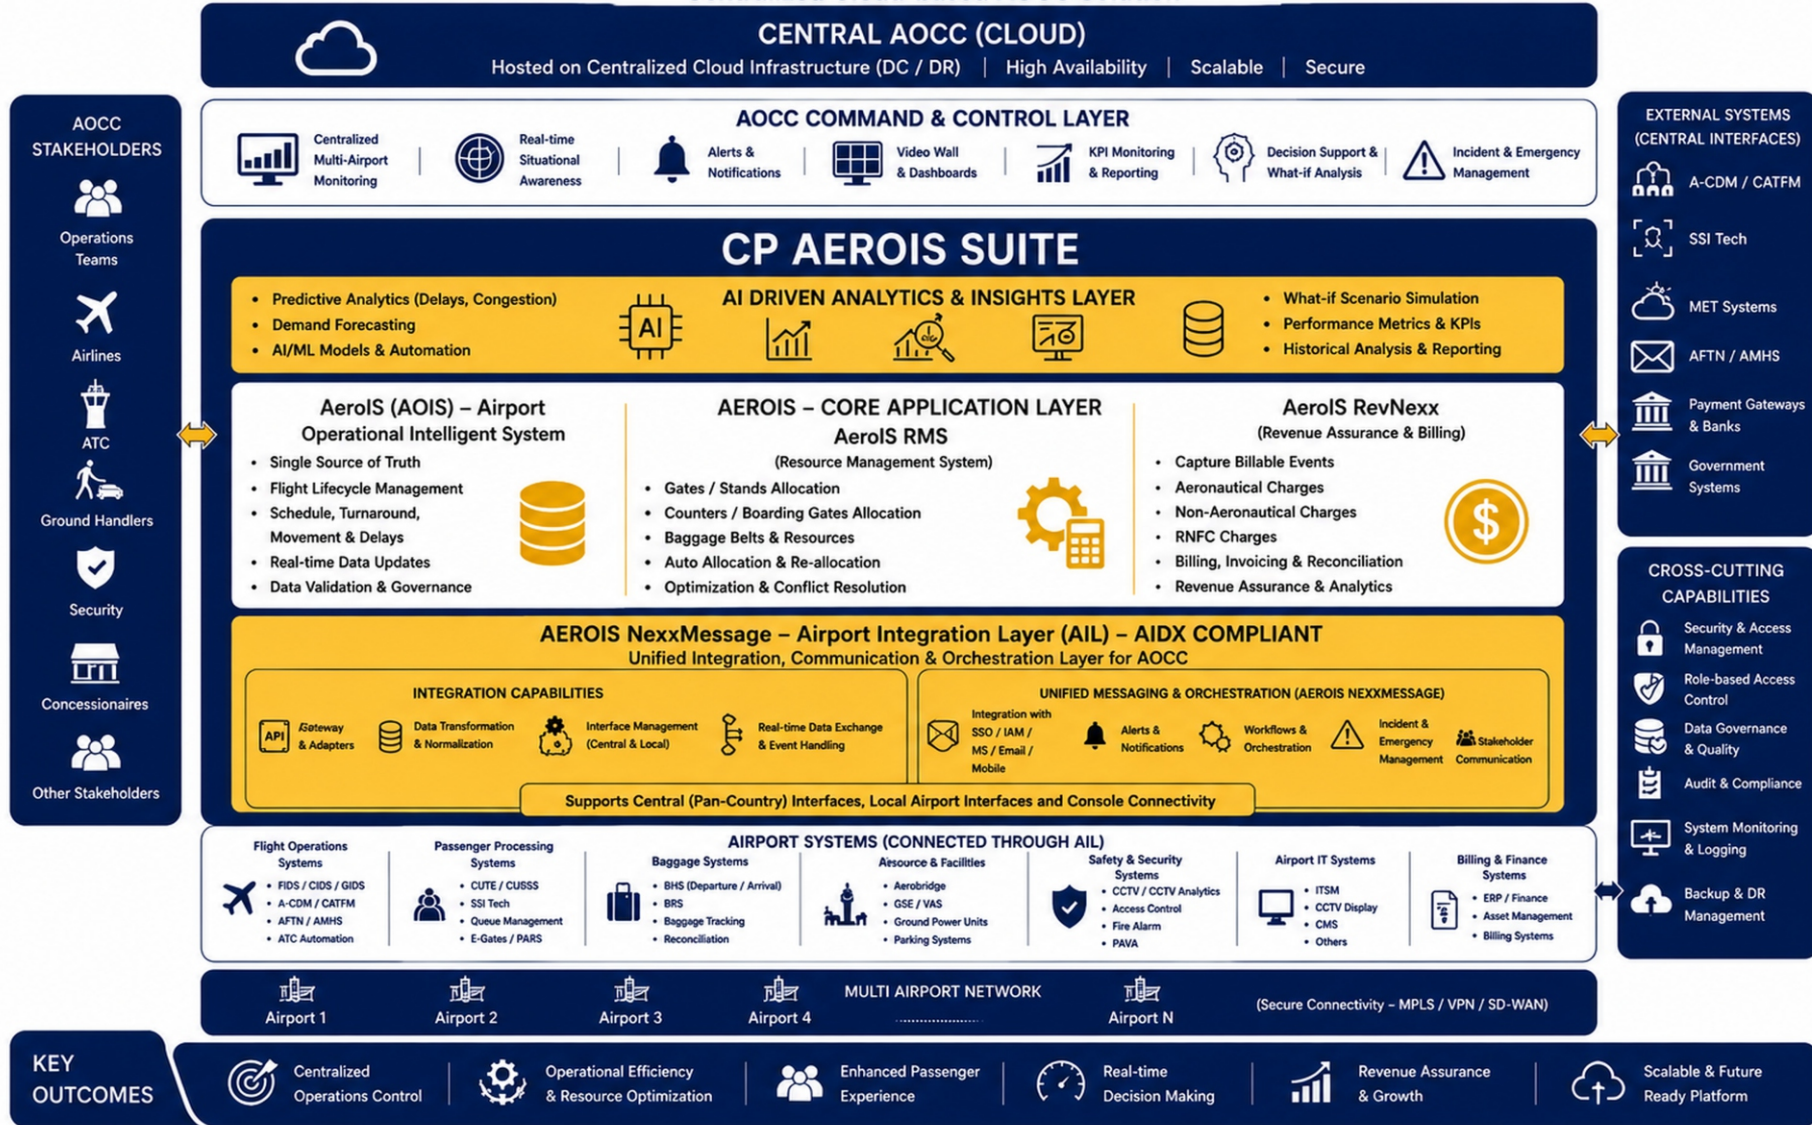

Building the Future of Airports Through Intelligence, Integration & Innovation

The Intelligence Layer for Modern Airports

High Level Architecture

Centralized Cloud-based AOCC Solution

Why Businesses Trust *CorePeelers*

At CorePeelers, we combine domain expertise, technology excellence, and a customer-first approach to deliver real value for airports worldwide.

Domain Expertise

Our team comprises domain experts with deep knowledge of airport operations and technology ecosystems.

Global Expertise

Proven experience in delivering solutions across airports worldwide, including greenfield and brownfield environments, ensuring seamless integration, operational excellence, and minimal disruption.

Innovative Solutions

We leverage AI, IoT, and advanced analytics to build intelligent, future-ready solutions that drive efficiency and enhance passenger experience.

System Reliability

solutions are built for high availability, scalability, and resilience to ensure uninterrupted airport operations.

24/7 Support

Our dedicated support teams are available round-the-clock to ensure smooth operations and quick resolution, always.

Trusted Partner.
Proven Commitment.
Future-Ready Airports.

A Partner You Can Rely On.
Today. Tomorrow. Always.

At CorePeelers, we don't just deliver solutions we build lasting partnerships. Our commitment to quality, innovation, and customer success makes us the trusted technology partner for airports worldwide.

Customer First
Your success is our priority.

End-to-End Partnership
From consulting and integration to deployment and support.

Future-Ready Approach
Enabling airports to adapt, evolve, and lead.

Secure & Compliant
Built with security, compliance, and data privacy at the core.

Value Delivered.....

Case Study 1: Airport Master System Integration (MSI)

Project : Greenfield International Airport

Challenge

Achieve operational readiness by consolidating numerous independent airport systems into a single integrated ecosystem.

What We Did

- Integrated AODB, FIDS, BHS, RMS, ERP & third-party airport systems
- Established seamless real-time data exchange across airport operations
- Created a centralized operational platform for all stakeholders

Value Delivered

- Connected 25+ airport systems into a unified ecosystem
- Enabled Day-1 operational readiness for airport operations
- Improved cross-functional coordination and decision-making
- Reduced manual intervention through automated system integrations

Case Study 2: Multi-System Integration for a New Greenfield International Airport

Project : New Greenfield International Airport (Europe)

Challenge

Integrate multiple mission-critical airport systems from different OEMs and ensure interoperability with the airport's wider digital ecosystem, within tight timelines.

What We Are Doing (Project in Progress)

- Acting as System Integrator for 4 critical systems: VCCS, MCS, EMS & HDS
- Delivering full lifecycle integration: requirements validation, interface planning, configuration, testing & commissioning
- Coordinating with OEMs, airport stakeholders & MSI for alignment with airport standards and operational procedures

Value being Delivered

- Four mission-critical systems integrated and commissioned
- Seamless interaction with airport-wide operational workflows
- Systems aligned with aviation and regulatory requirements
- Integration completed in line with airport readiness milestones

Case Study 3: Modernizing Live Airport Operations

Project : Brownfield International Airport

Challenge

Operational airport was losing revenue due to manual data entry errors and slow legacy cycles.

What We Did

- Integrated AeroBill into live environment without any disruption
- Automated data flow by connecting billing platform with AODB & ERP systems

Value Delivered

- Eliminated 100% manual data entry errors
- Achieved 30% reduction in operational costs
- Improved revenue assurance & cash flow

and many more such cases..

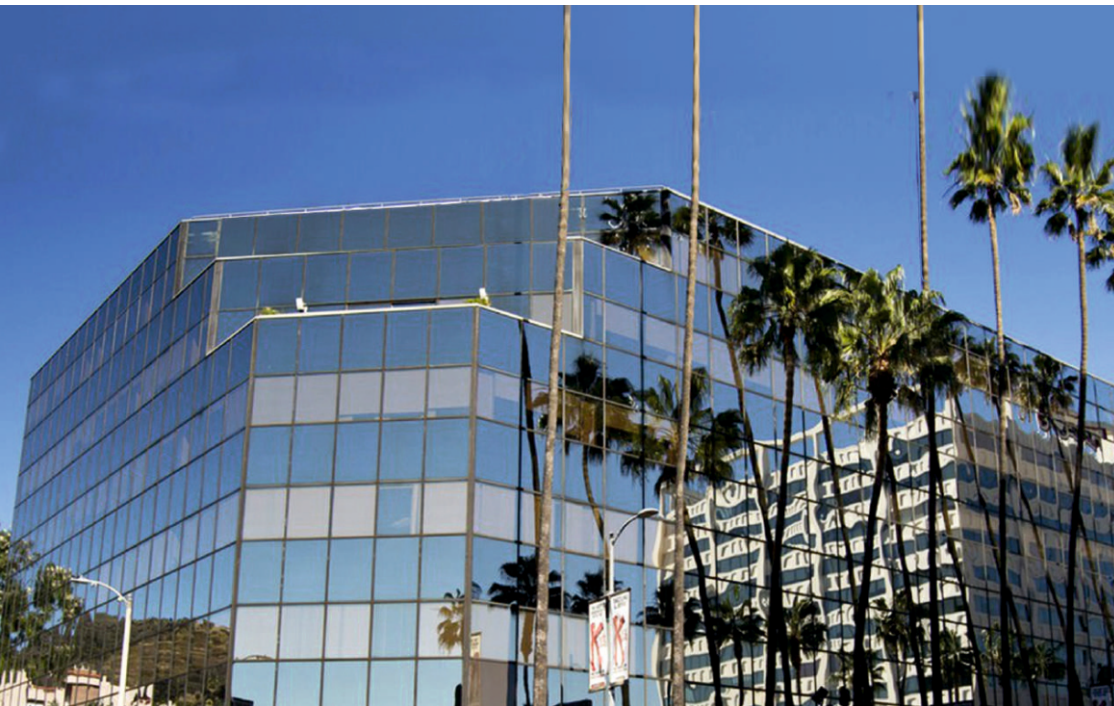

Our People make us Proud

Over the last ten years, our people at CorePeelers have been our biggest strength and have adjudged us as **The Great Place To Work** based on culture of diversity, equality & inclusion. Our unique **4 block Performance Management System** has enabled our people to deliver value to our clients, which in process has created value for the society too. Our people value our commitment to our clients and represent the culture of the organization in all circumstances.
